75%

of Missouri college students  
**believe students are  
harming themselves,  
physically or otherwise,  
when they use  
prescription drugs  
without a doctor's  
prescription** or do not  
use their own prescription  
medication as directed.

# Drug Effects

Prescription Drug Type

Health Risks

Other Consequences

## Stimulants

**Adderall, Ritalin, Vyvanse, Concerta**

High fever, convulsions, anxiety, hostility, nervousness, seizures, increased heart rate, respiration rate and blood pressure

Stimulants put excessive strain on the heart which can lead to heart failure and death

## Pain Relievers

**Vicodin, Percocet, Oxycotin**

Liver damage, intoxication, decreased mental alertness and concentration, nausea, vomiting, confusion, decreased concentration and decreased pain threshold

Regular or long term misuse can lead to physical dependence and in some cases addiction

## Sleep Medications

**Ambien, Sonata, Lunesta, Rozerem**

Lowered blood pressure, increased risk of respiratory distress and death when combined with alcohol

Combining sleep medications with alcohol is especially dangerous and can lead to death

## Sedatives

**Valium, Xanax, Ambien**

Loss of coordination, slowed reflexes, respiratory depression, aggressive behavior, hallucinations, inability to form memories while taking

Sudden withdrawal can cause convulsions and delirium

# Keep Your Medications Safe

## Don't Share Your Medications

Medications prescribed to you are for you alone and can have very dangerous effects on those you share with! It is also illegal to share your medications with others- you can be convicted as a drug dealer.

## Keep Your Medications Low-Profile

To avoid pressure to share your medications, keep them on the down low and don't advertise them.

## Properly Dispose of Old/Unused Medications

Take unused medications to your local disposal drop-box or take-back event! You can find out where and when these are held at [mopip.org/RX/resources.html](https://mopip.org/RX/resources.html)

**It is ILLEGAL**  
to take prescription drugs  
without a prescription.

---

**It is ILLEGAL**  
to distribute prescription  
drugs to anyone.

This includes just giving  
a pill or two to a friend.
